

Positive Reinforcement Dog Training Course

Build a Better-Trained Dog Through Positive Reinforcement

Would you like a dog who listens more reliably, walks more calmly, comes when called and understands what you are asking – without relying on fear, intimidation or harsh corrections?

Positive Reinforcement Dog Training is a practical, step-by-step course designed to help you understand how dogs learn and how to use that knowledge to build reliable everyday behaviour.

Rather than simply showing you a collection of commands, this course teaches you **how to become a better trainer**.

You'll learn why your dog behaves the way they do, how reinforcement changes behaviour, how to communicate clearly and how to make training enjoyable for both you and your dog.

What You'll Learn

During the course you'll discover how to:

- Understand how dogs learn using the **ABC model of behaviour**
- Use **positive reinforcement** effectively
- Develop accurate timing with a **marker word or clicker**

- Choose rewards your dog genuinely values
- Teach new behaviours through **luring, capturing and shaping**
- Introduce clear verbal and visual cues
- Build reliability using **Duration, Distance and Distraction**
- Generalise and proof behaviours in real-life environments
- Teach **Sit, Down, Stay and Wait**
- Build a strong and enthusiastic **Recall**
- Develop better **Loose-Lead Walking**
- Teach **Place and Settle**
- Teach **Leave It and Drop It**
- Reduce jumping and over-excited greetings
- Understand barking, whining, chewing and destructive behaviour
- Build better impulse control
- Understand fear, anxiety and reactivity
- Understand resource guarding and separation-related behaviour
- Structure effective training sessions
- Track progress and troubleshoot when training isn't working
- Maintain good behaviour throughout your dog's life

More Than an Obedience Course

Good dog training isn't simply about teaching Sit or Stay.

It's about understanding **why behaviour happens**.

Throughout the course, you'll learn to stop asking:

"How do I stop my dog doing this?"

and start asking:

"What would I like my dog to do instead – and how can I teach it?"

That change in thinking can transform the way you train.

Practical Training You Can Use Every Day

You don't need to spend hours training.

The course shows you how to use **short, focused training sessions** and everyday opportunities to develop better behaviour.

You'll learn how to recognise when your dog is succeeding, when an exercise has become too difficult and when it's time to take a break or change your approach.

Who Is This Course For?

This course is suitable for:

- New puppy owners
- First-time dog owners
- Owners wanting to improve an adult dog's training

- Owners interested in force-free training
- Anyone who wants to better understand their dog's behaviour
- Owners who want a clear training system they can continue using long after completing the course

No previous dog-training experience is required.

A Training System You Can Keep Using

By the end of the course, you won't simply have learned a collection of exercises.

You'll have a **Positive Reinforcement Training Toolkit** that you can use whenever you want to teach a new behaviour or improve an existing one.

You'll understand how to:

Observe → Plan → Set Up Success → Mark → Reinforce → Review → Adjust

Most importantly, you'll have a clearer understanding of your dog and a practical framework for continuing their training throughout their life.

Start Building Better Behaviour Today

Successful training doesn't happen through force or endless repetition.

It develops through **clear communication, appropriate reinforcement and small successful steps repeated**

consistently.

Join **Positive Reinforcement Dog Training** and learn how to build better behaviour while developing a stronger relationship with your dog.
