

Dog Training

Dog Training and behaviour modification

1. An overview of training methods and answers to common problems.

For a review of modern training techniques, the science and evolution of training, the basis of positive reinforcement techniques, clicker training, shaping, aggressive behaviour, counter conditioning, impulse control, loose lead walking and behaviour modification To discover more just [follow this link.](#)

2. Avoid hurting your dogs feelings.

Dogs bring immense joy and companionship to our lives. Their ability to sense human emotions makes them uniquely attuned to our moods and actions. However, this sensitivity also means they can be deeply affected by negative treatment or frustration from their owners.

Studies, such as those from the Universities Federation for Animal Welfare, show that yelling at a **dog** can raise their cortisol levels, causing stress. This highlights the importance of positive communication to maintain a healthy bond with your **pup**.

Understanding your **dog's** needs and emotions is crucial. Simple actions, like consistent commands and avoiding teasing, can prevent unintentional harm. This guide explores ways to ensure your furry friend feels **love** and security, fostering a stronger relationship. [Read the full post HERE](#)

3. The NO command.

Did you know that **puppies** can start learning basic obedience as early as eight weeks old? Yet, many **dog owners** focus solely on house training, missing a crucial opportunity to instil essential behaviours. One such behaviour is responding to the “no” **command**, a foundational skill for every **dog**. [Read the full text HERE.](#)

4. Training a rescue dog.

Welcoming a rescue dog into your home is a rewarding experience, but it often comes with unique challenges. These dogs may have faced uncertain pasts, making patience and understanding essential. With the right approach, you can help your new pet thrive and become a cherished member of your family. [Read the full post HERE.](#)

5. Scent Training.

Explore the amazing world of **canine scent work**. It changes how your dog thinks. Nosework training is a great way to keep your dog's mind sharp.

Dogs see the world differently, using their noses. They have up to 300 million olfactory receptors. This lets them sniff out amazing things. [Read the full Text HERE.](#)

6. Brain Games for dogs.

Did you know dogs can solve puzzles in under 90 seconds? This shows they have skills similar to two-year-old kids. Playing brain games with your dog is fun and helps their mind grow.

It's more than just playing. It's a way to use your dog's brain power. These games can make their day more interesting and stop bad behaviour. [See the full post HERE.](#)

7. Reactivity in Dogs.

Dogs become reactive for a variety of reasons. The problem can start at a very early stage in their lives. If this behaviour is left un-checked it can become a real problem and lead to isolation for the dog and its owner. [Follow this link to see](#)

[how it can be avoided and treated.](#)

8. Clicker training for dogs.

Dogs learn by repetition and positive re-inforcement of wanted behaviour. Actions that are not what the trainer wanted are discouraged or ignored. A clicker is a marker used to MARK the correct behaviour when it happens to communicate with the dog that they have performed the asked behaviour. [Follow this link for a full analysis of clicker training.](#)

9. Dog agility training.

Have you ever wondered what it would be like to compete with your dog in an agility competition? Its great fun and you can get fit as well as your dog! Click [HERE](#) to find out more details.

10. How to make dog walks more exciting for your dog.
